FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Re: *Ex Parte* Presentation in CC Docket No. 95-155 (DA-002754)

Dear Ms. Salas:

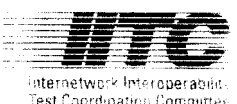

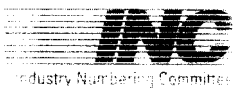

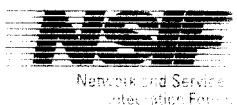

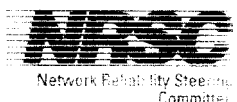

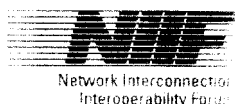

On June 1, 2001, the Alliance for Telecommunications Industry Solutions (ATIS) and its sponsored Ordering and Billing Forum (OBF) SMS/800 Number Administration Committee (SNAC) met with Commission staff to further discuss the May 16, 2001 letter from the OBF¹ (the "May 16 Letter") regarding the Disconnect Suspend Status Directive² (the "Directive"). The individuals representing ATIS and the SNAC were Pat Parker, Verizon, SNAC Co-lead; Ron Redfearn, WorldCom, SNAC Technical Subteam Co-lead; David Loose, Sprint; Anil Patel, DSMI; Ted Fernandez, SMT-Qwest; Ling-Ling Chu, Telcordia; YK Chen, Telcordia; Christopher Rugh, Worldwide Telegraph (via conference bridge); Megan Campbell, ATIS General Counsel; and Deseree Herring, SNAC Committee Administrator. The Commission staff in attendance included Marty Schwimmer, Attorney, NSD, CCB and Jennifer Gorny, Attorney, NSD, CCB.

The discussion was consistent with the presentation materials distributed, as well as the May 16 Letter. The presentation materials are included as an attachment to this letter. More specifically, the discussion focused on several functionality and business processes changes necessary to implement the Directive as provided for

under the current proposed design. The SNAC delegation set forth an alternative proposed design that would alleviate many of the functionality and business processes problems identified by industry while working to implement the Directive.

During the discussion, an understanding was reached with respect to the override capability "written authorization" as required in the Directive. The Directive reads, in relevant part,

"This capability may be used only in instances in which the Help Desk receives a letter (or other form of **written authorization** acceptable to the SMS/800) stating that the number was put into Disconnect Status by mistake and should be put back into Working Status, or that the number should be returned to Spare Status in less than 4 months."³ (emphasis added)

The SNAC delegation had suggested, as part of the alternative proposed design, that the written authorization requirement be automated through the SMS/800 interfaces (i.e., online, GUI and MGI). Such a process would allow for the override justifications to be stored electronically within the system. The Commission staff acknowledged that the override capability "written authorization" requirement could be satisfied through automated means.

At the conclusion of the discussion, the Commission staff suggested that the SNAC provide the Commission with an updated timeframe, based on current progress, with respect to the requested three-month extension for the implementation of the current proposed design.⁴ Accordingly, the SNAC met via conference call on June 5, 2001 and reached consensus to provide the Commission with the following updated timeframe:

If the requirements were delivered to the Industry by August 1, 2001, testing could begin on October 10, 2001 with an implementation date set for December 8, 2001.

Pursuant to Section 1.1206(a)(1) of the Commissions Rules, ATIS submits an original and one copy of this notice of *ex parte* contact for inclusion in the public record of the above-referenced

Disconnect

- Current Proposed Design
 - Disconnect numbers only returned to spare
 - Only recovered by request to Help Desk
- Alternative Proposed Design
 - Automate request through Online, GUI, MGI
 - Easily monitored through reporting
 - Need Unsolicited messages for any Help Desk changes

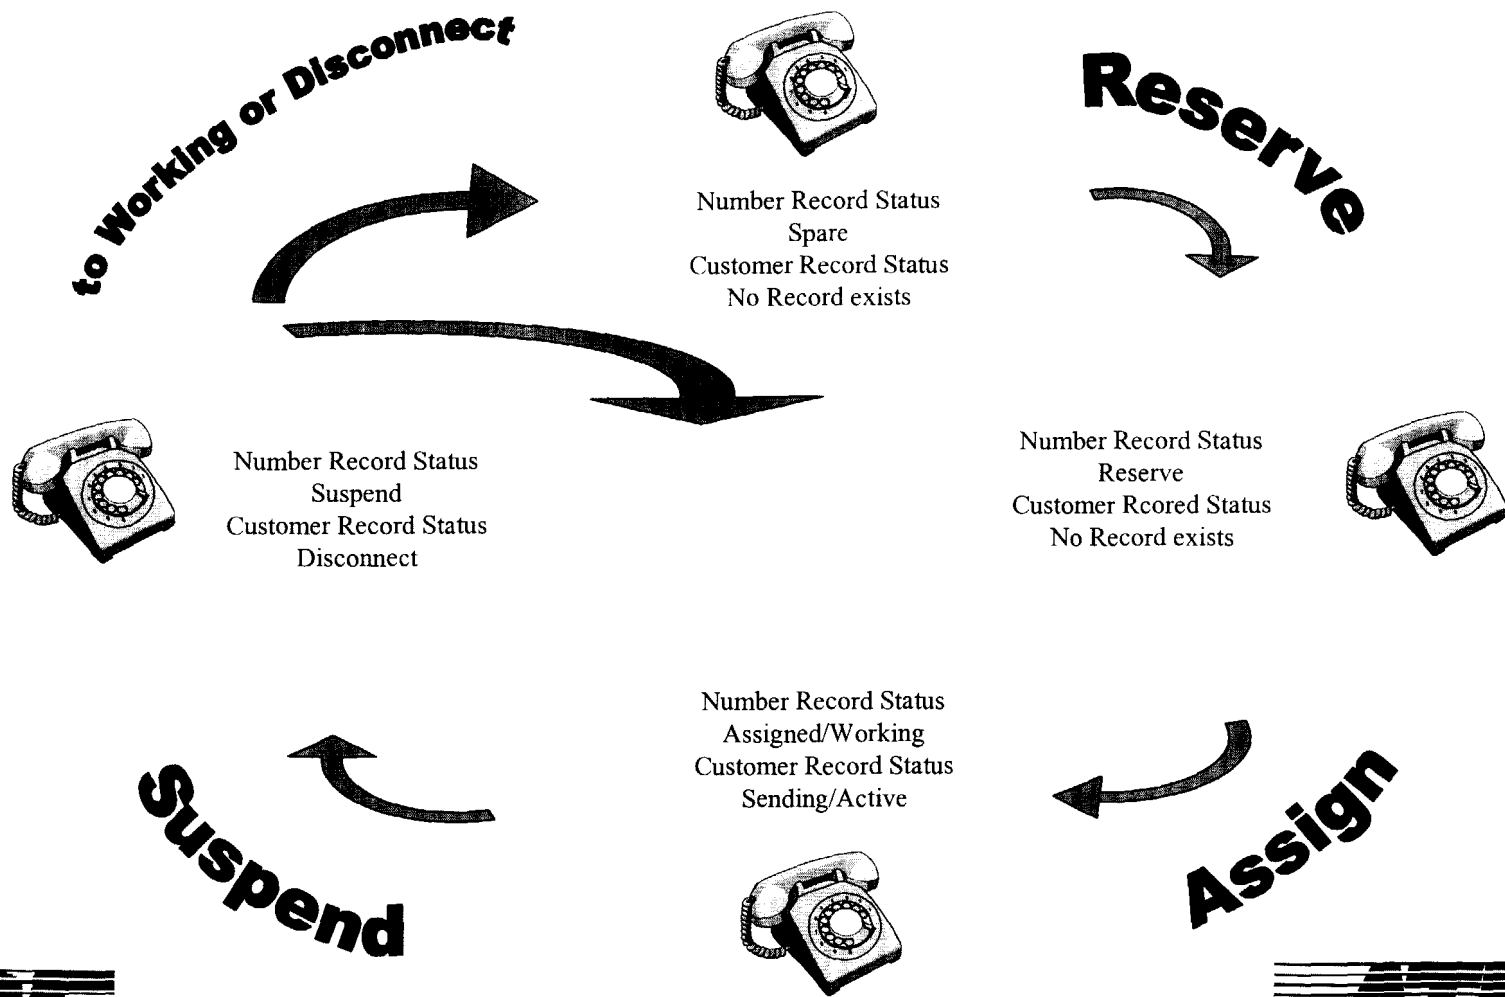

Suspend

- Current Proposed Design
 - Only returned to Working status
 - Customer record in Disconnect status
 - Cannot specify period to remain in Suspend status
- Alternative Proposed Design
 - Should go to Disconnect or Working status after End Intercept specified by the user
 - Unsolicited messages should be sent for any status change
 - Status of Customer record should be Suspend
 - Suspend status should only be viewable by Control RO

Proposed Non Pay
